

Subject Revision Sheet

Maths

Structure of Exam

There are three exams in Mathematics, each worth 1/3 of the total marks available for the qualification.

Paper 1 (Non-calculator)

Paper 2 (Calculator)

Paper 3 (Calculator)

Each paper is 1 hour 30 minutes.

Exam Paper Links:	Useful Websites/Apps/Books:
<p>Mathsgenie contains all the past exam papers as well as worked solutions for students to check their work.</p> <p>DrFrostMaths contains copies of the latest exam papers in a digital format for students to complete. When you login to the site click on tasks in the top right hand corner, followed by practice. You will then need to select EdExcel GCSE past papers.</p> <p>CorbettMaths has lots of past papers, similar to MathsGenie, alongside the worked solutions, which is a good alternative to Mathsgenie.</p>	<p>www.mathsgenie.co.uk</p> <p>https://www.drfrostmaths.com/</p> <p>https://corbettmaths.com/</p>
How to revise:	Tips to Answer Common/Extended Questions:
<p>Homework The first step should always be to complete your homework to the highest possible standard. Each task contains questions that you have recently learnt in class as well as key GCSE questions, so always start here.</p> <p>Practice skills using DrFrostMaths. The key to success in maths is by completing questions and past papers. Do not spend too much time making notes or watching videos. Continued practice of a skill until you master it is the best approach.</p>	<ol style="list-style-type: none">1) Try all questions (the majority of the marks is for the working out).2) Write down all the formulae you have used in the question.3) Show all steps of your working out.4) Check carefully through each step.5) Explain each step of your calculation with a few words.6) Check the units carefully.
